Software Engineering

Exam Information

COMP1003

Dr Horia A. Maior

Exam Structure

- 3 Sections - A, B, C
 - Answer ALL Questions in ALL Sections
- Focused on the Software Engineering principles taught
 - including some that the 'expected' reading helped to learn
- Worth 50% of the module
 - so the total possible score = 50 marks

How to Answer Questions

- All questions have a score that indicates how many points you should make
- ie. - if it says identify and describe 4 things [8 marks]
 - you need to identify and describe each of the 4 things
 - (not list 8 things just in case)
- i.e. - Describe the limitations of BLAH methodology [3 marks]
 - expects 3 specific separate points, each one mark each.

How to Answer Questions

- Be clear what your points are.
 - Don't hide them in long rambling fluffy paragraphs.
 - Make sure the marker can find them.
- **You have 120mins**
 - **therefore - spending 20mins on a [4 marks] question == a mistake.**

This year

- Exam questions will literally say ‘using 4 bullet points’
 - and each bullet point should be aimed to get 1 mark
- This is designed to help you manage time.
- These should be concise - 1 or 2 sentences.
 - These **SHOULD NOT BE A PARAGRAPH** each - thats doing it wrong

Preparing

- Obviously - you should have:
 - attended all the live lectures (or watched them back)
 - done all the expected reading
 - done all the lab sheets
- So step 1 is do all of that if you haven't been keeping up
- Step 2
 - do all of the example exam questions, and read the feedback it gives
 - read the relevant sections of the book

Practicing exam questions

- Practicing Exam Answers
 - don't forget you can test yourself!
- If you haven't done all of these by the day before the exam, then you have not prepared properly.

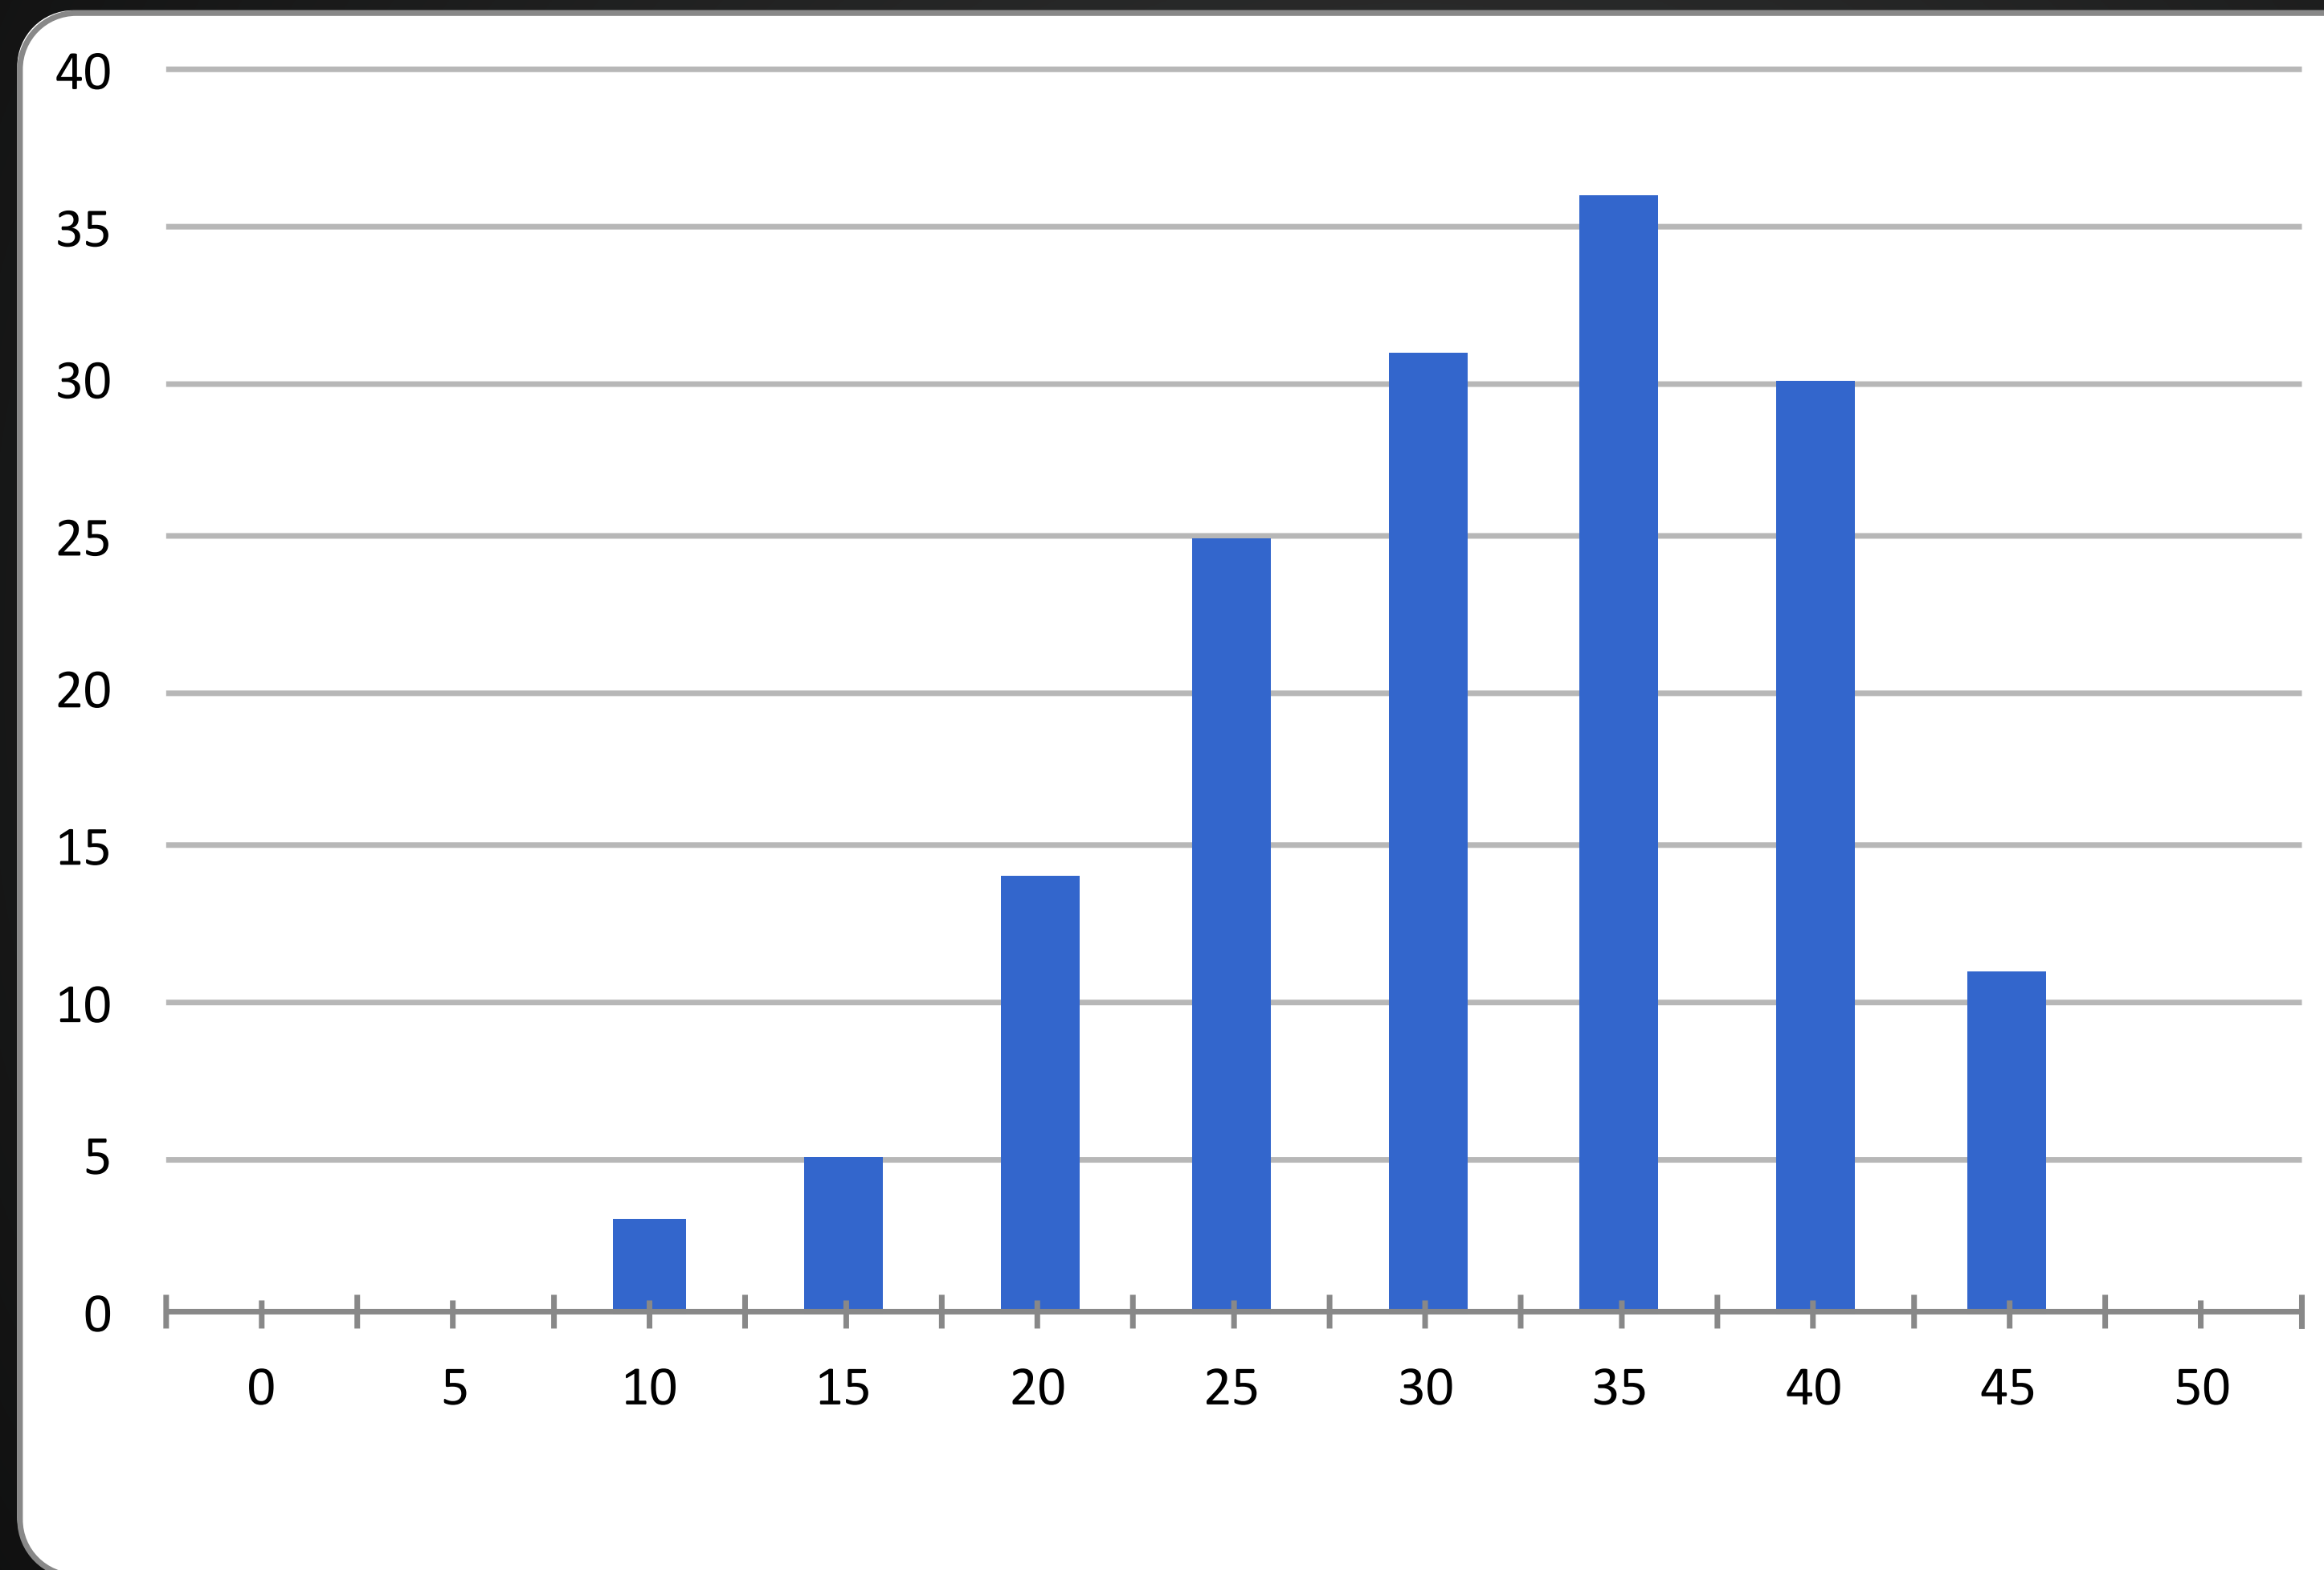

Preparing (in advance) in groups!

- I highly recommend you prepare for exams with friends.
- Compare your revision notes
- Discuss 'good answers' to the practice exam questions
- Its my **number 1 best advice for preparing for exams**

2019's Exam Performance

Remember

- Exam questions may be based on all of the expected reading.
-
